School and District Results For 2005	

Introduction

The 2001 re-authorization of the Elementary and Secondary Education Act of 1965 was signed into federal law January 8, 2002. Characterized in the statute as, "An Act to close the achievement gap with accountability, flexibility, and choice, so that no child is left behind," it carries the short title, "No Child Left Behind Act of 2001". Accountability measures required by the act are, in many respects, comparable to those comprising Kentucky's school accountability and testing system. For example, Kentucky set goals for proficient student performance and established a support system for schools in assistance via the Kentucky Education Reform Act of 1990 and 1998's House Bill 58.

Kentucky, like many states, has modified and/or supplemented our student assessments to comply with the federal statute and now uses assessment results to make both federal and state accountability decisions. Kentucky has retained its accountability system, while complying with the federal mandate. It accomplishes this through a two-dimensional system in which state and federal requirements are complementary. The federal and state school/district two-dimensional accountability model is summarized in Attachment A.

In addition to having implemented a system of assessments, Kentucky has already met other federal requirements by establishing school rewards and consequences, requiring school improvement plans, conducting scholastic audits and assigning highly skilled educators to support schools in assistance. Further, Kentucky has published student assessment results disaggregated by subpopulation and has implemented a unified data collection and reporting system. These are some of the many examples of how Kentucky's system of public education has been a national model for the last 16 years.

Wellstone Amendment

In April of 2006, the Kentucky Board of Education (KBE) approved adopting the flexibility that the USDOE offered that is commonly referred to as the "Wellstone Amendment." This is used as Kentucky transitions to accountability for reading and mathematics assessments in grades 3-8 in order to comply with NCLB.

The Augmented Norm-Referenced Test (A/NRT) was a one—year solution for 2006, and beginning in spring 2007, Kentucky will assess reading and mathematics in grades 3-8 with a new Kentucky Core Content Test (KCCT) in all NCLB-required grades. The previous accountability regulation included averaging data from two to three years preceding the current year to make AYP determinations if the school or a student subpopulation of sufficient size did not meet the goals for reading and mathematics using current year data. However, with the implementation of the Augmented NRT, there is only one year of data available from augmented NRT results. Therefore, Kentucky invoked the Wellstone Amendment and calculated AYP for the existing KCCT grades by averaging two years of data for all subpopulations of sufficient size, schools and districts.

In August of 2006, the KBE approved an emergency regulation to modify the existing regulation that included averaging data for two or three years to the last two years as required by the Wellstone Amendment (see below).

703 KAR 5:020 E

The aggregate average shall be computed based on the most recent two (2) years of student performance data in reading and mathematics from the KCCT.

Participation rate shall be computed as an average of the most recent two (2) years, to reach 95%.

The confidence interval shall also be based upon the same most recent two (2) years of student of student performance data upon which the aggregated average is based.

Basically, AYP is determined by using the percent proficient and above data and participation data from the last two years of KCCT data in reading (grades 4, 7 & 10) and mathematics (grades 5, 8 & 11.)

Comparing 2006 District/School Reports With 2005 Results

Because of the changes in implementation of NCLB for districts and schools from 2005 to 2006 (see Attachment B), comparisons from 2005 to 2006 should be made with caution. Analysis of the specific impact of these changes has not been completed. An impact study will be done to help us understand the degree of genuine school improvement from 2005 to 2006 versus increases due to changes in NCLB policy.

Adequate Yearly Progress (AYP)

Adequate Yearly Progress (AYP) is the term used in NCLB to refer to the minimum improvement required of each school and district over the course of one year; however, Kentucky has invoked the Wellstone Amendment and will use a two-year average. It is measured at the school and district levels by:

- measuring growth in the percentage of students scoring proficient or above in reading and mathematics.
- assessing improvement on the "other academic indicator."
- testing at least 95% of enrolled students and student subpopulations of sufficient size.

Details regarding these three components of AYP, and how schools and districts are able to make AYP, can be found in Attachment C.

Identification of NCLB Improvement Schools - NCLB Consequences

If a Title I school fails to make AYP in the *same content area for two consecutive years*, the school becomes a NCLB Improvement School. A series of consequences is outlined in NCLB for an Improvement School. Note that these consequences do *not* apply when a school misses its Annual Measurable Objective (AMO) in reading one year (but makes AYP in mathematics) and misses its AMO in mathematics the next year (but makes AYP in reading). AYP must be missed in the same content area (for whatever reason) for two consecutive years for consequences to apply. *It is important to note that if a school or*

<u>Rate, the school is considered to have missed its AYP in both reading and mathematics.</u> If that school or district misses its AMO in reading or mathematics the following year, the school/district will be considered as not making AYP in the same content area for two consecutive years.

The NCLB consequences are listed below.

- 1. PARENT NOTIFICATION (notification to parents in a school identified for NCLB improvement)
- 2. SCHOOL CHOICE (parents' option to transfer student)
- 3. Write or revise COMPREHENSIVE SCHOOL IMPROVEMENT PLAN
- 4. Offer SUPPLEMENTAL EDUCATIONAL SERVICES
- 5. CORRECTIVE ACTION
- 6. RESTRUCTURING

Attachment D provides more detail regarding each consequence and the timing of consequences, called NCLB Tiers. (Consequences only apply to Title I schools and districts.)

Timing of NCLB Reports

NCLB requires that assessment results be made available and AYP determinations be made prior to the start of the next school year. The Kentucky Department of Education (KDE) pursued options with its assessment contractor that resulted in scoring and reporting the full reading and mathematics assessments (both multiple choice and open-response) prior to the beginning of the 2006 school year. This was not possible to achieve in 2005. As a result, the reporting of *preliminary* AYP determinations based upon the multiple-choice portions of the KCCT in mathematics and reading is *not* necessary this year. The August AYP determinations are final and are based on the complete reading and mathematics assessment scores, including open-response items. For example, if the August AYP decision result in NCLB consequences at the school or district level (for example, the requirement to offer school choice), then parents must be given the option of school choice.

District Accountability

NCLB requires district-level accountability to be based on an aggregate of students' scores from all schools in the district. District accountability for subpopulations, based on aggregated scores, also is required. Current regulation (703 KAR 5:130) establishes both state and federal dimensions of district accountability. The federal dimension is based on aggregate student data and mirrors federal school accountability calculations and procedures.

2006 Observations for Schools

• 766 schools met 100% of their No Child Left Behind (NCLB) AYP goals. That's 65.8% of all schools in Kentucky.

- 88.9% of elementary schools, 31.9% of middle schools and 22.7% of high schools met all their NCLB goals.
- Of the 398 schools (34.2%) that did not make AYP, 241 of these schools made 80% or more of their goals (129 of these schools met at least 90% or more of their goals). Overall, 1,007 schools in the state (86.5%) met 80% or more of their goals.
- 52 schools (4.5% overall) did not make AYP on the Other Academic Indicator. For elementary and middle schools, the Other Academic Indicator is the CATS accountability classification. For high schools, the graduation rate is the Other Academic Indicator (16 schools did not make AYP because of graduation rate).
- On the performance of the African-American subpopulation, 61 schools did not make AYP in reading, and 84 schools did not make AYP in mathematics.
- On the performance of the free/reduced lunch subpopulation, 118 schools did not make AYP in reading, and 181 schools did not make AYP in mathematics.
- On the performance of the students with disabilities subpopulation, 234 schools did not make AYP in reading, and 186 schools did not make AYP in mathematics.

2006 Observations for School Districts

- 80 of 176 school districts (45.5%) met 100% of their No Child Left Behind (NCLB) AYP goals.
- Of the 96 school districts (54.6%) that did not make AYP, 64 of these districts made 80% or more of their goals (29 of these school districts met at least 90% or more of their goals). Overall, 144 of 176 school districts (81.8%) in the state met 80% or more of their goals.
- 12 school districts (6.8% overall) did not make AYP on the Other Academic Indicator. The Other Academic Indicator is the CATS Accountability Classification (for elementary and middle grades) *and* the graduation rate (for high school grades).
- On the performance of the African-American subpopulation, 10 school districts did not make AYP in reading, and 17 school districts did not make AYP in mathematics.

 On the performance of the free/reduced lunch subpopulation, 21 school districts did not make AYP in reading, and 41 school districts did not make AYP in mathematics.

• On the performance of the students with disabilities subpopulation, 64 school districts did not make AYP in reading, and 61 school districts did not make AYP in mathematics.

2006 Observations for the State

- 19 of 25 target goals (76%) were met at the state level. This is up from 16 of 25 target goals (64%) last year. All student subpopulations met the requirements for Participation Rate. As noted above, caution should be used when comparing the 2006 NCLB Reports with 2005 NCLB results.
- Statewide, 68 Title I schools are in Tier 1 consequences; 26 Title I schools are in Tier 2 consequences; 56 Title I schools are in Tier 3 consequences; 1 Title I school is in Tier 4 consequences; and 5 Title I schools are in Tier 5 consequences. There are 38 Title I districts in Tier 1 consequences; 11 Title I districts in Tier 2 consequences; and 43 Title I districts in Tier 3 consequences.

NO CHILD LEFT BEHIND **ADEQUATE YEARLY PROGRESS REPORT - 2006**

August 09, 2006

State

Grades: PRIMARY-12 Code: 999

Met 19 out of 25 target goals (76.0 percent)

Title I: Yes Made Overall AYP: No

Under the federal No Child Left Behind Act a school/district must make 100 percent of its target goals in order to qualify as having made Adequate Yearly Progress (AYP).

		Annual ble Objective	Met Participation	Other Academic
Student Group*	Reading	Mathematics	Rate	Indicator**
All Students	Yes	Yes	Yes	
White (Non-Hispanic)	Yes	Yes	Yes]
African-American	NO	NO	Yes	1
Hispanic	Yes	Yes	Yes] _v
Asian	Yes	Yes	Yes	Yes
Limited English Proficiency	NO	Yes	Yes	1
Free/Reduced Lunch	Yes	NO	Yes	1
With Disability	NO	NO	Yes	1

For other measures of school progress see Commonwealth Accountability Testing System (CATS) results at: http://www.education.kv.gov/

- The school reduced by at least 10% the number of students in the subpopulation who are not proficient, and
- That subpopulation meets the criteria for demonstrating improvement on the Academic Index.

^{*} If a student group is listed as n/a in the chart, it means there were not enough students in that group at this school to get a valid score for AYP purposes.

Each student is included in the "All Students" group.

**For elementary and middle schools, the "Other Academic Indicator" is the overall CATS 2005 midpoint Classification, which covers the other content areas as well as reading and mathematics. For high schools the Other Academic Indicator is the Graduation Rate. The Other Academic Indicator for schools with middle and high school grades is both the CATS 2005 midpoint Classification and the Graduation Rate.

***If a subpopulation doesn't meet its Annual Measurable Objective, it can still be in "Safe Harbor" and considered to have made AYP if:

School Results For 2006

Definitions for Implementation of NCLB for Districts and Schools, 2005-2006

Definitions for Imp	Definitions for Implementation of NCLB for Districts and Schools, 2005 - 2006						
Issue	2005- 2006	Comments					
Full Academic Year 703KAR 5:001 Sec. 1 (21), (22)	One hundred (100) <i>instructional</i> days (not necessarily consecutive) of enrollment in a school, from the first day of school to the first day of testing window.	No change since 2003-2004					
Sufficient Size for Participation Rate 703 KAR 5:001 Sec. 1 (35), (36), (52) 703 KAR 5:020 Sec. 10 (09)	Computed only when the school or district has 10 subpopulation students per accountability grade tested per year and 60 subpopulation students overall at the school in the accountability grades tested over two years. Participation rate will be computed by averaging 2 years of data. (Wellstone Amendment)	Wellstone Amendment has changed this definition by requiring two years of data.					
Sufficient Size for Annual Measurable Objective (AMO) 703 KAR 5:001 Sec. 1 (52)	Both (1) and (2) below are required. Note that (2) may be accomplished in two ways: (1) 10 subpopulation students tested per grade per year; and (2) (a) 60 subpopulation students school-wide in the KCCT grades over two years; or	Wellstone Amendment has changed this definition by requiring two years of data. Tests used for 2006 NCLB reporting are: KCCT Reading grades 4, 7 & 10					
Calculation of Annual	(b) Subpopulation count comprises 15% of all students in the KCCT grades over two years.KDE with the support of KBE has evoked the Wellstone	KCCT Mathematics grades 5, 8 & 11 Wellstone Amendment has changed this definition					
Measurable Objective (AMO) 703 KAR 5:020 Sec. 10 (3), (9b) 703 KAR 5:130 Sec. 8 (3), (7b)	Amendment which uses two years of data to calculate the percentages of accountable students who scored proficient or above in reading and mathematics compared to the specific grade-level configuration target.	by requiring two years of data.					

Issue	2005- 2006	Comments
Other Academic Indicator 703 KAR 5:001 Sec. 1, (11b), (12b), (13b) 703 KAR 5:020 Sec. 10, (2b), (5b)	Use of CATS biennial or mid-point classification for elementary and middle schools from the prior year. This indicator will be considered to be met if a school is classified as progressing (any category), meets goal, or if in assistance has demonstrated growth in the accountability index at or above the state average for the specific grade-level configuration.	No change since 2004-2005.
703 KAR 5:130 Sec. 8, (2b), (5b)	Use of graduation rate from the prior year for high schools.	
Graduation Rate 703 KAR 5:001	 In addition to students who receive four-year diplomas, the following students qualify as graduates: Students, who do not graduate in four years, but have an Individual Education Plan (IEP) documenting their need for more than four years of secondary school education to complete their program. 	No change since 2003-2004.
Drop-Out Count	 Students in the school drop-out count include: Students who withdraw from a Kentucky school and do not enroll in another school or district or district-contracted General Educational Diploma (GED) program, or Students who enroll in a GED program, but do not earn their GED by October of the following year. 	No change since 2004-2005

Issue	2005- 2006	Comments
a	Final reports in August 2006 reflect both multiple choice and open response results for KCCT reading and mathematics for students.	The Augmented NRT data is reported but only KCCT reading and mathematics is used for AYP determinations.
Proficient (LEP) Students 703 KAR 5:070 Inclusion of Special Populations in the State-Required Assessment & Accountability Program	New LEP students are counted in participation rate, but need not be included in AYP or CATS accountability. New LEP students Must be tested using a state-approved English language proficiency assessment. Must be tested in mathematics (grades 5, 8, 11). May be tested in reading (grades 4, 7, 10). The English language proficiency test will be used for determining Participation Rate instead of reading. Second and Subsequent Years: Must participate in all state-required assessments (except the Writing Portfolio which is not required in the second year). The test scores of LEP students are included in AYP and the Commonwealth Accountability Testing System (CATS). LEP Subpopulation Membership: Students must be retained in the LEP accountability subpopulation for up to 2 years following attainment of English proficiency as reflected on results of the state-approved English language proficiency test. However, in connection with reporting subpopulation results, LEP students who have attained English proficiency may be excluded from subpopulation size computation.	No change since 2003-2004.

ATTACHMENT C

Details Regarding the Three Components of AYP and How Schools and Districts are Able to Make AYP

Details Regarding the Three Components of AYP:

(1) <u>Measuring Growth in the Percentage of Students Scoring Proficient or Above in Reading and Mathematics</u>

All schools in a grade level have the same Annual Measurable Objectives (AMO). The objectives are expressed as the percent of students at proficient or above, computed separately in reading and in mathematics. (Starting points and AMOs by year are given in Attachment E.) The federal goal is for all schools and subpopulations (i.e., race/ethnicity, limited English proficient, free/reduced lunch and students with disabilities) of sufficient size to score at proficient or above by 2014 in both reading and mathematics. For 2006, calculations of AMOs average two years of the most recent student performance data. Confidence intervals are based on the same years of data as AMOs.

(2) <u>Assessing Improvement on the "Other Academic Indicator"</u>

Besides increasing the percentages of students scoring at proficient or above in reading and mathematics, NCLB requires the use of an "other academic indicator" in determining a school or district's AYP. In 2004, the other academic indicator for elementary and middle schools was the Commonwealth Accountability Testing System (CATS) Accountability Index and for high schools was graduation rate. Both the accountability index and graduation rate had to be *lagged* one year in order to be used as the NCLB other academic indicator.

At its June 2005 meeting, the Kentucky Board of Education changed the other academic indicator at the elementary and middle school levels from the full accountability index to the CATS biennial classification and the CATS mid-point classification, whichever is the most currently available classification. Thus, schools classified as any category of Progressing or Meets Goal would be considered as meeting the requirement for the other academic indicator. Data would still be lagged by one year in order to meet NCLB-required reporting timelines. For example, in 2006, the 2005 CATS midpoint classification would be applied, and in 2007, the 2006 CATS biennial classification would be used. The board also approved regulatory language to allow the opportunity to recognize growth in addition to school classification. More specifically, schools in the Assistance category that demonstrate growth in the accountability index at or above the statewide average for the specific grade-level configuration would be designated as meeting the other academic indicator requirement. The Local Superintendents Advisory Council proposed this additional caveat, a statutorily created group that reviews and provides advice on every regulation change considered by the board.

In summary, for schools or districts that contain elementary, middle and high school levels, both the CATS accountability classification and graduation rate are used for the other academic indicator. For elementary and middle schools, meeting the requirement for the other academic indicator is defined as a:

- school classification of Progressing or Meets Goal, OR
- if in the Assistance category, growth in the accountability index at or above the statewide average for the specific grade-level configuration

NCLB improvement on graduation rate means a graduation rate that:

- is equal to or greater than the corresponding annual goal, OR
- exceeds that of the prior year

(3) Testing at Least 95% of Enrolled Students and Student Subpopulations of Sufficient Size

To meet AYP, the school/district as a whole and each subpopulation of sufficient size must have at least a 95% participation rate. This calculation will be done for reading and mathematics combined. The *Participation Rate* criterion is 10 students per grade and 60 students overall in grades where NCLB assessments are required. This criterion for calculating Participation Rate was intended to address those situations where students cannot be tested for reasons beyond the control of the school or student, e.g., an unanticipated absence or medical emergency. The criterion was given final approval by the Kentucky Board of Education in December 2003. In addition, recent federal guidance allows Participation Rate to be computed for the current year or as an average over *two* or *three* years, whichever results in a 95% Participation Rate.

Meeting AYP

A school or district fails to make AYP if it:

- didn't meet the AMO in reading for all students and every subpopulation of sufficient size.
- didn't meet the AMO in mathematics for all students and every subpopulation of sufficient size.
- didn't improve the Other Academic Indicator. For elementary and middle school levels, the school/district didn't meet the required accountability classification of Progressing (any category) or Meets Goal, or if in Assistance, did not demonstrate growth in the accountability index at or above the state average for the specific grade-level configuration. At the high school level, the school/district didn't meet the graduation rate annual goal or improve graduation rate.
- didn't test 95% of all students or student subpopulations of sufficient size.

For example:

- To make AYP in reading, a school/district and every subpopulation of sufficient size must meet the AMO for reading and have at least a 95% participation rate. In addition, the school/district as a whole must meet the requirement of the other academic indicator.
- To make AYP in mathematics, a school/district and every subpopulation of sufficient size must meet the AMO for mathematics and have at least a 95% participation rate. In addition, the school/district as a whole must meet the requirement of the other academic indicator.

It is important to note that if a school or district does not meet the requirement of the accountability classification at the elementary and middle school levels and/or graduation rate at the high school level, or did not test at least 95% of all enrolled students and each subpopulation of sufficient size, the school is considered to have missed its AYP in both reading and mathematics.

As the term AYP suggests, progress toward NCLB academic goals is evaluated annually, whereas progress on CATS is evaluated biennially. For definitions and explanations of other important terms used in NCLB, including:

- Starting Points, AMOs
- Safe Harbor
- Participation Rate Sufficient Size
- Percent Proficient or Above and Confidence Levels
- Reading and Mathematics in Grades 3–8
- Full Academic Year
- Reading and Mathematics in Grades 3–8

See the 2006 NCLB Interpretative Guide that can be found on the Kentucky Department of Education's Web site at: (http://www.education.ky.gov).

ATTACHMENT D

NCLB Consequences and the Timing of Consequences Called NCLB Tiers

NCLB Consequences:

PARENT NOTIFICATION (Notification to parents in a school identified for NCLB improvement)

- What NCLB Improvement School identification means
- Reasons for identification
- What the school is doing to improve
- How parents can become involved
- What district and KDE are doing

SCHOOL CHOICE (Parents' option to transfer student)

- All students in school identified as a NCLB Improvement School may transfer
- Can transfer to another public school in district not identified as a NCLB Improvement School
- Priority given to lowest-achieving children from low-income families
- District pays for transportation

Write or revise COMPREHENSIVE SCHOOL IMPROVEMENT PLAN to include:

- Scientifically-researched instructional strategies
- Practices to improve core academic subjects
- Specifics for 10% of school's Title I allocation for professional development
- Strategies to promote effective parent involvement
- Extended school activities
- Teacher-mentoring program

Offer SUPPLEMENTAL EDUCATIONAL SERVICES

- Low-income students attending school identified as a NCLB Improvement School
- Tutoring and academic intervention outside of the regular school day
- Provider must be approved by state
- District may become provider as long as District is not a Title I Improvement District

CORRECTIVE ACTION (District must do one of following)

- Replace school staff relevant to improvement
- Institute and implement new curriculum
- Decrease management authority consistent with state law
- Appoint an outside adviser
- Extend school day or year
- Restructure internal organization

RESTRUCTURING (District must prepare alternative governance arrangements by planning to implement one of the following)

- Replace all or most of staff relevant to failure
- Turn operation over to the state consistent with state law
- Determine any other major restructuring that makes fundamental reforms possible
- Implement if school continues not making AYP

The following provides information about the timing of NCLB consequences:

<u>Tier 1 of Consequences</u> (2 years not making AYP)

- Implement School Choice
- Write or revise School Plan

<u>Tier 2 of Consequences</u> (3 years not making AYP)

- Continue School Choice
- Revise School Plan
- Offer Supplemental Services

<u>Tier 3 of Consequences</u> (4 years not making AYP)

- Continue School Choice
- Revise School Plan
- Continue Supplemental Services
- Institute Corrective Action

<u>Tier 4 of Consequences</u> (5 years not making AYP)

- Continue School Choice
- Revise School Plan
- Continue Supplemental Services
- Continue Corrective Action
- Write a Plan for Alternative Governance consistent with state law

<u>Tier 5 of Consequences</u> (6 years not making AYP)

- Continue School Choice
- Revise School Plan
- Continue Supplemental Services
- Continue Corrective Action
- Implement Alternative Governance consistent with state law

The table on the following page provides examples for determining the status of Title I schools based on AYP results.

	Determining Status of Title I Schools Based on Adequate Yearly Progress Results								
Title I School Name	P	AYP Dete	erminatio	on by Yea	ır	AYP Status			
	2003	2004	2005	2006	2007				
Moore Elementary	Yes	No	Yes	No	Yes	OK!!!			
ABC Elementary	Yes	Yes	Yes	No	No	Tier 1 of Consequences			
Heart Elementary	Yes	Yes	No	No	No	Tier 2 of Consequences			
123 Elementary	No	No	No	Yes	Yes	Out of NCLB Improvement			
Active Elementary	No	No	No	No	Yes	Tier 3 of Consequences			
Sims Middle School	No	No	No	No	No	Tier 4 of Consequences			
Hill Middle School	No	No	Yes	No	Yes	Tier 2 of Consequences			
Jay Middle School	No	No	Yes	Yes	Yes	Out of NCLB Improvement			
Oh Boy High School	No	No	Yes	No	No	Tier 3 of Consequences			
Hello High School	No	No	Yes	Yes	No	Out of NCLB Improvement			

The above table provides examples about when consequences are implemented under NCLB. Several additional points include:

- NCLB requires school transfer within the district. However, KDE encourages districts to work
 with neighboring districts for transfer arrangements, if another school of the same level does
 not exist in the district. If a child moves, the original district must provide transportation to the
 new school as long as the original school remains an NCLB Improvement School. If the
 original school's status changes, the child may continue at the new school but parents can be
 asked to assume the transportation responsibility.
- The replacement of staff would require the following of due process procedures and would have to be done within the constraints of the appropriate Kentucky Revised Statutes.
- A Highly Skilled Educator (HSE) could be an outside adviser.
- Restructuring has two components: developing the restructuring plan and implementing the plan the next year, if the school fails to make AYP again.
